

Sprint 4 Plan

Product Name: MUNCH

Team Name: Cookie Monsters

Sprint Completion Date: 12/3/17

Revision Number: 0.0.69 (Codename Durian)

Revision Date: 11/20/17

Goal: Our goal in this sprint is to fully connect our implementations, implement the use of a server to store data, and make final adjustments/implementations.

Task List:

1. As a user, I would like to be able to save restaurants as favorites.

Tasks:

- i. Save places that users have been to (*4 hours*)
- ii. Set up firebase database to store user information (*4 hours*)
- iii. Complete implementation of preferences and settings (*3 hours*)

TOTAL TIME: *11 hours*

2. As a consumer, I want to be surprised by my restaurant choices.

Tasks:

- i. Use API to seek pattern of the types of restaurants available and implement randomizer(*Time to Complete: 4 hours*)

TOTAL TIME: *4 hours*

3. As a developer, I want to complete my aesthetic changes to the product.

Tasks:

- i. Overall tune ups(*Time to Complete: 3 hours*)

TOTAL TIME: *3 hours*

Team Roles:

Ryan Cho: Product Owner, Developer

Justin Tse: Developer
